

2022 Master Pruner Program

Sunday morning class schedule

This series of classes is taught by experts in tree and plant care.

To become a PlantAmnesty Master Pruner, you need to attend 12 classes and 3 hands-on workshops.

If you're not interested in the whole series, just attend the classes that interest you.

LOCATION

Online, via Zoom. Shifting to in-person classes at Magnuson Park when possible.

In-person address:

6344 NE 74th St,
Seattle, WA 98115

SCHEDULE

Second Sunday
10 a.m.—12 p.m.

REGISTRATION

Register through our website,

NOTE: Online classes will be recorded for later viewing. In-person classes will not be recorded.

Sunday, January 9 —Fruit Tree Pruning

Learn the basics of fruit tree pruning, and why you should prune them differently than other trees. This class will cover apple, cherry, plum, and pear trees.

Sunday, February 13 —Rose Pruning

Learn the basics of rose pruning and how to approach the different types of roses, including hybrid tea, shrub and climbing roses.

Sunday, March 13—Tree Pruning I

This is the *science and biology* behind the pruning of trees. Find out how to minimize the inevitable damage done by pruning by understanding the tree's natural defenses.

Sunday, April 10—Trees II

This class will show you how and when to apply a specific pruning system. This class will cover the natural pruning system, including structural pruning of young trees and mature tree pruning techniques (crown cleaning, crown thinning, crown raising, crown reduction).

Sunday, May 8 —Shrubs I: Friendly, Fearless and Forgiving

This class covers basic cuts, basic plant habits and what Cass Turnbull called the "pruning budget". It also covers five plants that are relatively easy to prune: nandina, evergreen azalea, lilac, camellia, and yew.

Sunday, June 12 —Japanese Garden Pruning

Creating and maintaining a Japanese Garden requires a high level of pruning skill and dedicated annual maintenance. This class covers the pruning of Japanese maples (upright and weeping), bamboo, cloud pruning pines, and tamamono shearing.

Sunday, July 10—Shrubs II: Shearables, Hackables and Untouchables

There are some plants that are cut to the ground each year, but there are others you barely touch and it's pandemonium! Find out which ones are which, as well as which plants are appropriately sheared every year.

Sunday, August 14 —Shrubs III: The Puzzlers and Consequences

This class teaches how to prune Rhododendron, Hydrangea, Callicarpa (Beautyberry), Viburnum bodnantense, and Abelia. Included in this class are basic pruning techniques, common pruning mistakes, and corrective pruning.

Sunday, September 11 — How to Renovate and Prune the Overgrown Garden Landscape

This is one of PlantAmnesty's most popular classes and offers an introduction to pruning and landscape renovation. Learn how to undo overplanting errors, when and how to transplant, and how to clean up a neglected landscape.

Sunday, October 9 —Vines

This class covers pruning and management of some of our most common ornamental vines: wisteria, common varieties of clematis, Boston ivy/Virginia creeper, trumpet vine, and honeysuckle.

Sunday, November 13 — Rehabilitative Pruning

Learn the three most common forms of mal-pruning (tree topping, over-thinning of trees and shrubs, and inappropriate shearing) and how to fix trees and shrubs that have been mal-pruned. Included is discussion of waterspouts, suckers, radical renovation techniques, and crown restoration .

Sunday, December 11—Art or Atrocity

This class covers the three main forms of mal-pruning: tree topping, inappropriate shearing of trees and shrubs, and over thinning. We compare and contrast mal-pruning with bona fide examples of pruning art: pollarding, cloud pruning, topiary, pleaching, and coppicing.
